Doug,

How much time do we have to present?

Hi Alanna

You have a good sense of what our neighbors will find most useful. As the principle player in all this, your guidance in navigating all the data and choices is particularly relevant. We are looking forward to the September 8th meeting.

Thanks for making time to come. Doug

Hello Doug,

I am confirming EPA participation in the CPNA meeting on Sept 8<sup>th</sup> at 7pm.

It would be helpful if you let me know what information the Association would like to hear or discuss so we will be prepared.

Tentatively – we will be prepared to give a brief overview of the Portland Harbor, status report and schedule of next steps. We would also like to hear feedback from the audience on a couple questions that could help in our next steps. Based on community requests, we have developed an activity book for 6-8<sup>th</sup> grade students that we'd also like to share.

We look forward to meeting the members and the dialogue about the future of the River.

Alanna Conley

Hi Alanna

Thanks for getting back to me. Summer's a busy time. We would love to have a report at our next meeting, Tuesday, September 8th, 7pm at the BES Water Lab. We had a good response at The Lower Willamette presentation at the July meeting and a follow up from you will keep the issues to the front of my neighbors' minds. Thanks again for the offer. I'll get in touch as we get closer.

Doug

Hello Doug,

I was unable to respond to your request. We would be like to visit Cathedral Park NA and provide an overview, timelines and updates. Please contact me after August 11 to set up a date that we can have a dialogue with the Neighborhood Association.

EPA is aware of the Rival Event and provided printed copies of the posters and handbills to Barbara Quinn in support of the event.

I will still be traveling during through August 11 and will miss the Revival. Oregon DEQ plans to attend the event so I provided multilingual material and Portland Harbor Brain-bender children's activity books to ODEQ to distribute during the Revival. There is also info on SunWise (sun protection for children to prevent cancer) books and stickers for children, and green cleaning products. We hope this will help.

Please call me after Aug 11 to set up a presentation date.

Thank you, Alanna [503-326-6831](tel:503-326-6831)

The Cathedral Park Neighborhood Association is hosting presentations from DEQ and the Lower Willamette Group at our 7pm, July 14th meeting. As the lead representative of the Super Fund cleanup along our neighborhood river front, might you or someone from your office be available to do a short presentation summarizing your work and timelines and how you interact with the other players involved in the cleanup? We meet in the same BES conference room where I've attended several CAG meetings about remediation options. The Neighborhood is co-hosting with the CAG an environmental fair on August 2nd to build community awareness about upcoming cleanup decisions. We would also like to discuss your possible participation at that event. Thank you for your consideration.

Doug Larson

Chairman, Cathedral Park Neighborhood Association
